Re: WCR27/83<sup>rd</sup> Ave Repairs

### COUNTY TO BEGIN OVERLAY PROJECT TO WELD COUNTY ROAD 27/83<sup>RD</sup> AVE.

WELD COUNTY, CO – The Weld County Department of Public Works will begin repair work on the county's portion of Weld County Road 27, also known as 83<sup>rd</sup> Ave. in Greeley, beginning September 16. Approximately 1.5 miles of the road will undergo repairs to existing pavement and shoulders as well as striping for the new pavement.

“Weld County continues to observe increased surface distress and pavement degradation to this portion of road,” said Weld County Engineering Compliance Analyst Richard Hastings. “We have determined that repair is now necessary for this portion of CR27/83<sup>rd</sup> Ave.”

The overlay project will occur on CR27/83<sup>rd</sup> Ave. from Highway 34/10<sup>th</sup> St. north 1.09 miles and from CR64/O St. to the south .44 miles, including the bridge. The portion of the roadway between those two sections, near the Poudre Learning Center, is owned and maintained by the City of Greeley, who declined to participate in the repair project with the county, citing the need to focus on other municipal road projects at this time.

The project, which will begin September 16 with milling operations followed by paving, striping and shoulder work, is expected to be completed within three weeks. The road will not be closed during this time, but it will be reduced to one-lane of traffic with flaggers. Expect some delays during this period, and please watch out for road crews
