WELD COUNTY DEBUTS IMPROVEMENTS TO PROPERTY PORTAL

WELD COUNTY, CO – The Board of County Commissioners and the Weld County Information Technology Department have made numerous improvements to the county's online property mapping system including:

- An easier way to search for parcels
- Check property sales
- Export information to Excel and PDF files
- Search for property taxes
- Check city limits
- Research school districts and commissioner districts
- Zoning and permit information
- Users can utilize styling tools to draw and type on the map

People learning about the new Property Portal from Dan Huerter, Weld County Senior GIS Analyst.

"We are very excited to present the next generation of the property portal," said Weld County Assessor, Chris Woodruff. "It has been enriched with property data from many county departments and will now operate in a mobile environment. This is the outcome of the hard work of many members of Team Weld, and we are proud to release it to the public."

The Weld County property information map pulls together public information from various sources, including the Weld County Assessor's Office, Planning Department, Public Works Department and Colorado Oil and Gas Conservation Commission (COGCC).

"As technology evolves, we need to upgrade our platforms," said Jake Mundt, Weld County Director of

GIS and Web Development. "This most current version ensures that the most up-to-date and accurate information is available to all Weld County residents."

"The improvements to the portal will be very useful for residents," said Commissioner Mike Freeman, coordinator for the Information Technology Department. "Our hope is that it will be a resource which empowers residents to research county information."
