County Overview

Physical Characteristics

Weld County is located in the northeastern portion of Colorado, a key component of the Colorado Northern Front Range. Its unique location places it between the Rocky Mountain Foothills and the Great Plains, approximately 40 miles east of the Continental Divide. The County ranges in elevation from 4,400 feet above sea level, at the egress of the Pawnee Creek grasslands in the far northwest, to approximately 6,200 feet above sea level near the Pawnee Buttes situated in far northeast part of the County. The County has a number of valuable streams and rivers -- the Big Thompson, the Cache la Poudre, St. Vrain and the South Platte, with its tributaries that flow into Weld County from the south and west, and continue to the east. These rivers facilitate a water system that delivers water to farmland throughout the county, through some of the largest and most complex reservoir and irrigation systems in the world.

The County consists of approximately 3,992 square miles and is the third largest in the State, making it also twice the size of the State of Delaware. The County is bounded on the west by Larimer and Boulder Counties, on the east by Morgan and Logan Counties, on the south by Adams and Broomfield Counties, and on the north by Laramie County, Wyoming, and Kimball County, Nebraska.

Located in the interior of the North American continent, Weld County experiences mild temperature changes from season to season, with sometimes rapid weather changes occurring due to storms traveling generally from west to east throughout the region. Weld County's population in 2015 was 284,876 according to the Colorado Department of Local Affairs.

The County seat and principal city in Weld County is the City of Greeley, located within an hour's drive of the majestic Rocky Mountains and six major municipalities, including Denver. The population for the City of Greeley in 2015 was 101,302. In comparison, the population in the State of Colorado was 5,456,584, which resulted in an increase of 26% from 2000 to 2015.

County Population Overview

Weld County's population growth rate has been approximately 28% per decade since the mid-1900, which is more than triple the national average. Between 2000 and 2010, the population increased 39.7%. The County was the fastest growing county in the nation from 2000 to 2004 according to U.S. Census Bureau.

Over 285,000 people lived in the County in 2016, which represented approximately 5% of the total state population. The median age of the County residents in 2016 was 34, compared with the state median age of 37. The gender distribution ratio was similar for both County and the State for this time frame.

The County population in 2010 showed increasing diversity in the percentage of race categories, with 67% of the County population classified as white, not of Hispanic or Latino origin, and 31% of the county population classified as persons of Hispanic or Latino origin. According to us Census Bureau, total white population dropped from 82% in 2000 to 67% in 2010. The 2000 Census was the first year in which respondents could select multiple race categories.

A review of the historical and future projections of population growth in the County reveals a steady increase in the total population every decade from 2000 to 2010, except 1930 to 1940, when it declined. The population density increased from four people per square mile in 1900, to 63.2 people per square mile in 2010. It is projected by the Colorado Division of Local Government to increase to over 122 people per square mile by 2030.

Approximately half of the population is located in an 800-square-mile area in the southwestern part of the County. The 2010 population density for this area is was approximately 68 people per square mile.

Among the 64 counties in Colorado, Weld County ranks ninth in total population. Between 2000 and 2015, the State grew at a rate of 26%. For this same period of time, the County grew by 40% and the nation by 10%.

Since 2000, Weld's population has outgrown the State's average every year, peaking at 45% in 2004, which placed Weld County into the top ten counties in total population in the State.

Population growth in the County is projected to average a compounded growth rate of 3.75% a year from 2015 through 2035. This growth rate is more than double the annual compounded growth rate of 1.575% projected for the State. This trend would increase Weld County's total population to over half a million by the year 2035.

Economic Overview

Weld County had a per capita personal income (PCPI) of \$38,664 in 2014, compared to \$50,410 State-wide. The PCPI in Weld was 76% of the national average in 2006. The County's average wage is estimated at \$34,320 in all industries, according to the State Demographer's Office.

According to a 1997 study conducted by Colorado State University, Weld County continues to be an "Agribusiness Important" county, although the degree of agribusiness' importance is declining. "Agribusiness Dependent" counties are those counties which receive more than 20% of total county income from agribusiness industries, whereas "Agribusiness Important" Counties receive between 10% and 20% of total county income from agribusiness industries.

However, Weld is the most agriculturally productive county in the State, according to U.S. Department of Agriculture (USDA). In 2012, Weld County's agricultural lands accounted for 5.8% of the State's 31,886,676 acres of land committed to farming. In 2012, the number of full time farms in Weld County was 3,525, with a market value of products sold at \$1.8 billion a year. In 2012, there was 856,240 irrigated acres, which is down from 906,619 irrigated acres in 2007. This equates to a 5.6% drop.

The overall age dispersion of the County's population resembles the state population, with the exception that the County has a proportionally a younger work force.

Economic Development

Weld County has four internal driving sources that have been identified for future economic growth:

I. Natural & Reusable Energy Resources

- A. Wind Powered Energy
- B. Solar Power
- C. Greenhouse Emission Innovations
- D. Mining
- E. Biogas
- F. Water Recycling (oil and gas)

II. Open Entrepreneurship Market Place

- A. Hispanic Businesses/Latino Dollar
- B. Telecommunications/Fiber Optics
- C. Professional and Business Services
- D. The Self-Employed (10% of total U.S.)
- E. Unmet Market Opportunities
- F. Incubators (Firms, Universities, and Linking Networks)
- G. Home Based Businesses

III. Growth Rate

- A. Half a million people by 2035, 3% growth rate
- B. Greeley 2nd fastest growing metro area in State (2006)
- C. Attractiveness for retirees
- D. Healthy, growing young labor force

IV. Location

- A. 1 of 12 Counties along the "Front Range "Megapolitan," the confluence of two or more major metro areas.
- B. Proximity to Denver International Airport, Rocky Mountain, and Denver Metropolitan
- C. 2 Major Interstates (I-25 and I-76); major highways (US 85, US 34) and the new WC Parkway along CR 49 to facilitate growth and transportation
- D. Northern Front Range cities, major universities and community colleges

County Median Household Size, Family and Household Income

Year	Median Household Size		Median Family Income

Colorado	2,898,000	2,792,000	106,100	3.7%

Transportation Overview

Transportation in the County is provided by Interstate I-25 and Highway 85 for north and south transit up and down the Front Range corridor. Highways 14, 52, and 34 facilitate east and western transit, and Interstate 76 provides for broader easterly and western travel. The highway and road system in the County is managed, by the Colorado Department of Transportation, the County, and the 32 municipalities, with the County maintaining 2,954 miles of publicly maintained county roads. The County's road system presently consists of 737 miles of paved roads and 2,217 miles of gravel roads. In addition, there are currently 471 miles of state highway system roads which are described below.

64.6 Interstate Miles

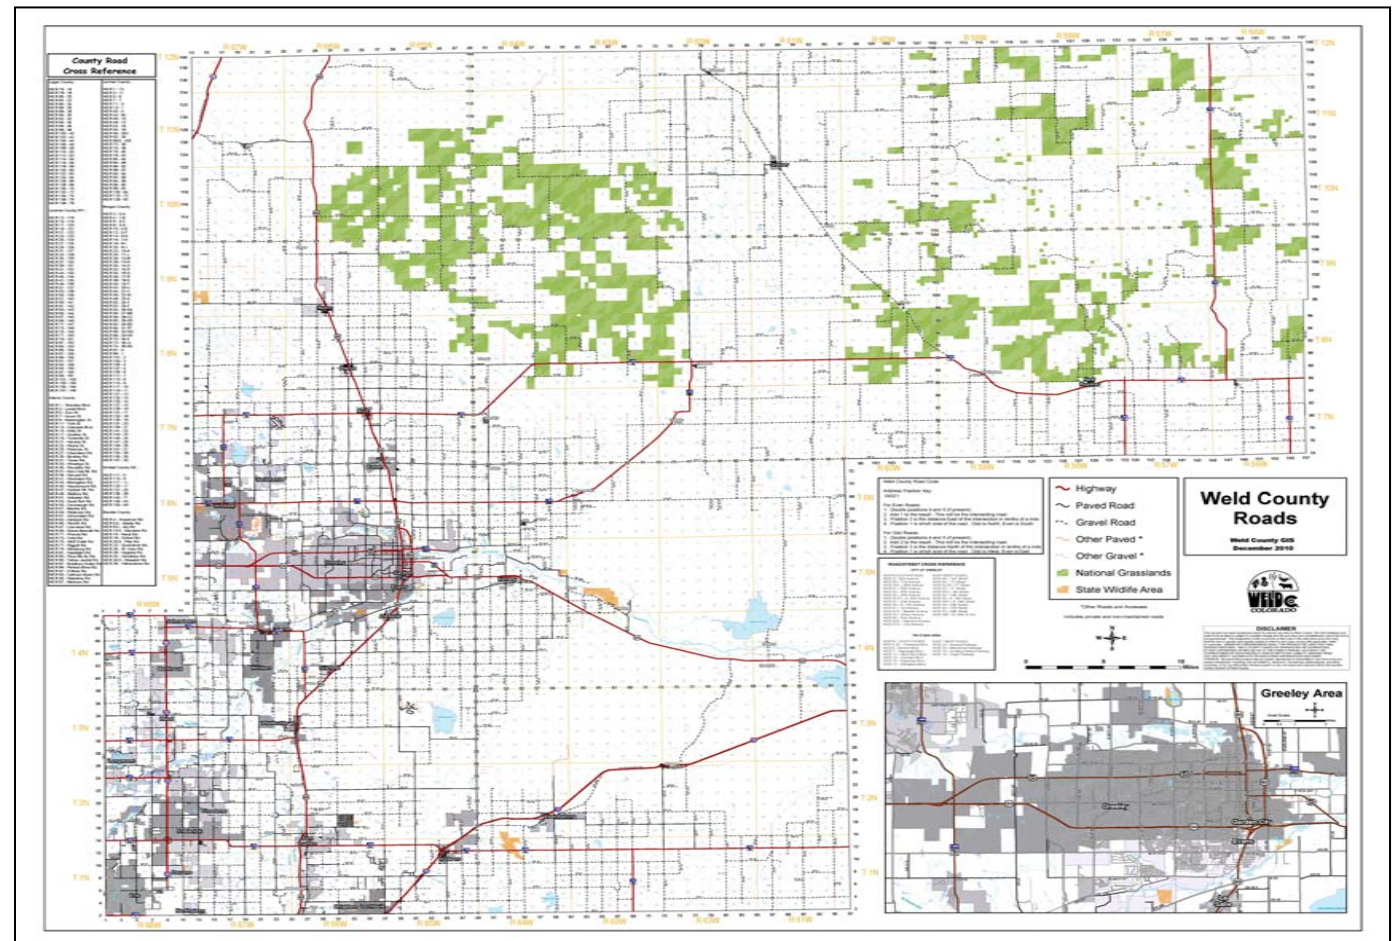

57.1 Arterial Freeway and Expressway Miles

224.3 Principal Arterial Miles

57.3 Minor Arterial Miles

64.7 Major Collector Miles

Development Trends

Following the great recession (2006-2009) development activity in Weld County increased substantially. In 2009, EOG drilled a well outside the Town of Grover known as the “Jake”. It produced over two thousand (2,000) barrels of oil per day during initial phases and gradually subsided. The “Jake” made headlines across the State because it was one of the first wells to be fracked using horizontal drilling technology. Shortly after EOG made headlines a flurry of oil and gas activity hit Weld County. In particular, the new activity was focused on the Niobrara play, whereby historically, the oil and gas activity in Weld County was primarily located in the DJ / Wattenberg basin. Needless to say, once oil and gas operators began to harness the horizontal fracking technology Weld County was at the forefront of an epic energy boom.

The energy boom ramped up in 2010 and continued strong through early 2015, with the peak hitting in 2014. Oil prices in 2014 averaged \$80 / barrel. During this peak there were over 85 operators and 65 rigs working 24/7 throughout the County. Beginning in early 2015 the energy sector was hit hard with oil falling to an average of \$35 / barrel. Exploration and production was halved and many companies left the County or began to consolidate and sell off acreage positions.

During the energy boom, the Planning Services Department hit record numbers in terms of work output. The Building Services Division, for example, saw a 9% increase in total permits from 2010 through 2015. Plan review and inspections also increased by 40% and 54% respectively during the same period. The Planning and Zoning Division was in a similar situation. For example, the total land use cases increased 137% between 2010 and 2015. The oil and gas boom created a domino effect that propelled other sectors of economy forward. For example, the unemployment rate dropped from 7.1% in 2006 to 3.7% as of June 2016. In addition, the overall labor market improved with employers across all sectors hiring to keep up with demand. Wages increased while the cost of living remained relatively flat. The County’s overall fiscal health and stability led the County Commissioners to decrease the property tax on two occasions over the last ten years and County citizens continue to enjoy some of the lowest taxes in the State of Colorado.

Weld County Small Business Incentive Plan (SBIP)

Weld County Appreciates Your Business

The economy in Weld County is strong, probably one of the reasons you chose to move your business here.

The Weld County Board of Commissioners appreciates that decision, and we want to help your business grow and thrive in our county.

To help do that, Weld County has established a Small Business Incentive Program (SBIP) which will provide eligible businesses financial assistance to offset land use, building permit, and several impact fees.

The program is designed to reduce upfront capital outlay for small businesses located in Weld County.

Please review the information in this brochure, and learn how this program can help you.

We are glad you chose to do business in Weld County.

Who can apply?

Any business owner or tenant located in unincorporated Weld County that meets the eligibility requirements.

What are the eligibility requirements?

- The subject real property must be located within the County (the "Property").
- The business shall hire at least fifty (50) percent of their new workforce that reside in Weld County. For the purpose of this application a full-time employee works a minimum of 32 hours per week. The business may have a combination of part-time employees that is the equivalent of at least one (1) full-time employee.
- The applicant must be the second owner(s) of the Property or a tenant.
- The business must have been undertaken after the date of the adoption of this policy.
- This program shall only apply to businesses with 25 or fewer employees at the time of submitting an application.

What can be done with these funds?

The intent of these funds is to offer financial assistance to small businesses that want to operate in Weld County. The financial assistance helps reduce the business's land use application fees, building permit fees, and impact fees.

Fees incurred by the business that are not eligible for funds include consultant and attorney fees, on-site and off-site bonding, collateral requirements, etc.

What is the application process?

Complete a Small Business Incentive Program Application form available at the Weld County Department of Planning Services (1555 N. 17th Ave., Greeley) or online in the Planning and Zoning section of the county web site: www.weldgov.com.

Mail the completed application to the attention of the Director of Planning Services: 1555 N. 17th Avenue, Greeley, CO 80633. There is no application or processing fee.

The Planning Services Director will review all requests and make a recommendation to the Weld County Board of Commissioners who will provide approval/denial.

Approval shall be based on the following:

- Submittal of a business plan.
- Documentation that the business owner has consulted with the Small Business Development Center (SBDC).

FUNDING OVERVIEW

0-9 employees:

Fees between \$5,000 - \$25,000.
County max: \$20,000
Applicant portion: \$5,000 + any amount above \$25,000

10-15 employees:

Fees between \$5,000 - \$35,000
County max: \$30,000
Applicant portion: \$5,000 + any amount above \$35,000

16-25 employees:

Fees between \$5,000 - \$45,000
County max: \$40,000
Applicant portion: \$5,000 + any amount above \$45,000

Example 1: \$10,000 total fees assessed and 5 employees. Applicant would pay \$5,000 and County would grant \$5,000.

Example 2: \$40,000 total fees assessed and 14 employees. Applicant would pay \$5,000+\$35,000=\$40,000 and County would grant \$30,000.

Example 3: \$80,000 total fees assessed and 25 employees. Applicant would pay \$5,000+\$35,000 and County would grant \$40,000.

Funds shall be distributed on a first-come, first-served basis.

All applications are confidential and at the full discretion of the Weld County Board of County Commissioners.

Applicants must be a property owner or be a tenant (with written permission from the building owner) operating a retail, commercial or industrial business as defined and permitted under the Weld County Code.

Applicant must be current on all County taxes prior to receiving funds.

The Weld County Board of County Commissioners or its designee has sole authority to determine the eligibility of proposed business.

If you have questions or would like further information, please contact the Planning Services Director at 970-353-6100, ext. 3572.

All inquiries are kept strictly confidential.

Weld County Small Business Incentive Program

WELD COUNTY
PLANNING DEPARTMENT

Weld County has established a Small Business Incentive Program (BIP) which will provide eligible businesses financial assistance to offset land use, building permit, and several impact fees. The program is designed to reduce upfront capital outlay for small businesses located in unincorporated Weld County.

WHO CAN APPLY?

Any business owner or tenant located in unincorporated Weld County that meets the eligibility requirements.

WHAT ARE THE ELIGIBILITY REQUIREMENTS?

- The subject real property must be located within the County (the "Property").
- The business shall hire at least fifty (50) percent of their new workforce from Weld County. For the purpose of this application a full-time employee works a minimum of 32 hours per week. The business may have a combination of part-time employees that is the equivalent of at least one (1) full-time employee.
- The applicant must be the record owner(s) of the Property or a tenant.
- The business must have been undertaken after the date of the adoption of this policy.
- This program shall only apply to businesses with 25 or fewer employees at the time of submitting an application.

WHAT CAN BE DONE WITH THESE FUNDS?

The intent of these funds is to offer financial assistance to small businesses that want to operate in Weld County. The financial assistance helps reduce the business's land use application fees, building permit fees, and impact fees. Fees incurred by the business that are not eligible for funds include consultant and attorney fees, on-site and off-site bonding, collateral requirements, etc.
