Below are the answers to questions that occurred for the County Road 15 Tower Design Services bid (B1800152).

1. Will you be wanting a building automation system (BAS) to control the HVAC system, and send alarms?
   ANSWER: No.

2. Will you be wanting a new Fire Alarm system?
   ANSWER: No.

3. How many design meetings should we anticipate, and will the meetings be onsite, or conference calls?
   ANSWER: This question is subjective per company and timeliness of delivery. Anticipate weekly meetings throughout design process. Weekly meetings will be held at 1105 H Street, Greeley. Depending on progress meetings could be lessened or conducted via conference call but this cannot be guaranteed.

4. The RFP states to provide design services for “programming”. What programming are you referring to regarding MEP Engineering services?
   ANSWER: Programming entails discovering the client’s needs and goals and getting them down on paper in either written or graphic format (or both).

5. Would you like us to provide Construction Administration as part of our proposal, and if so, what would you like included? RFIs, Submittal Review, Site observations, weekly construction calls, Final Punch, Record Drawings?
   ANSWER: Include RFI resolution, as-built/record drawings, submittal review and punch list. Weekly construction meetings are not required. However, if site visits are required for RFI resolution, then those should be included.

6. Just want to verify that bids under the $50,000 limit will not require a bond in any form, is that correct?
   ANSWER: Correct, bond not require under $50,000.
