Below are the answers to questions that occurred for the Chase Cooling Tower Replacement bid (B1900031).

1. Page 9 #1 C. All associated water pumps (condenser, chilled, secondary, etc.) Does this mean you are requesting that all these pumps be replaced with new pumps under this bid?

   ANSWER: Yes, all to be replaced. Manufacture, type, capacity were all observable during mandatory pre-bid meeting.

2. Page 9 #1 D. Associated frequency drives. During the walk I did not see existing frequency drives. Are you requesting that drives be added under this project? If so, on what motors?

   ANSWER: Frequency drives may be part of the engineer designed solution. If so, then they need to be included in the bid total.
