QUESTIONS & ANSWERS FOR B1900061 #2
LAW ENFORCEMENT BODY WORN CAMERA SYSTEM
MARCH 4, 2019

THE QUESTIONS HAVE NOW BEEN INCLUDED.

Question # 1:
Under “General Information” (page 9) within the RFP, it states: “Vendors should fill out the BWC Vendor Response Form in its entirety and include answers behind Tab 2 in the Vendor's RFP Proposal.” - Can the County please clarify what other Tabs are expected as part of Vendor's proposal? The RFP does not lay out Vendor Proposal Layout expectations.

Answer
The vendor should complete the Vendor Response Form in its entirety. The Vendor Response Form contains 5 worksheets. There are no layout expectations regarding the proposal, however the material in the proposal should be consistent with the answers contained in the Vendor Response Form.

Question # 2:
Under “Proposal Delivery to Weld County - 2 methods” (page 1), it states: “If more than one copy of the proposal is requested, you must submit/mail hard copies of the proposal.” - The RFP does not stipulate number of copies to be submitted - Can the County please confirm that only one copy of the proposal is being requested and prefer email submission?

Answer
Only one copy of the proposal is requested. Email submission is preferred.

Question # 3:
Can the County please provide anticipated dates for the following project milestones:

a) Onsite Presentations / Demos:

b) Field Trials with Equipment:

c) Award Date:

d) Project Deployment Start/Kickoff:

Answer
Currently, Weld County does not have an established timeline for the project other than the closing date of the RFP process. The timeline depends on the demands of the RFP process. Future milestones and deadlines will be communicated as they become available. It’s desirable to complete the entire process including deployment no later than the third quarter of 2019.
Question # 4:
Under “Camera Requirements” (page 10) it states, “Unit shall have a field of vision of at least fifty (50) degrees.” - Would the County like vendors to supply BWCs that meet the NIJ's recommended FOV of at least 90° to adequately capture the activity surrounding the officer? This minimum recommended FOV has been widely adopted by agencies across the country.

Answer
The desired field of view should be at least (no less than) 50 degrees. A field of view that exceeds 50 degrees will satisfy that requirement of the RFP. NIJ's recommended FOV would satisfy that requirement of the RFP.

Question # 5:
Under “Camera Requirements” (page 10), it states, “Unit should be compatible with common industry standard trunk mounted mobile routers to facilitate video upload under field conditions.” - Due to the wide variety of trunk routers available in law enforcement vehicles, can the County please provide the make/model of existing trunk routers so we can accurately confirm compatibility?

   a) If the County selects a vendor that is presenting a router option included in its proposal, should that router be BAND 14 compatible to ensure Weld County has access to priority network services.

   b) To provide an accurate quote option with routers included, can the County please provide the number of vehicles needing routers?

Answer
Currently Weld County does not have trunk mounted routers. Weld County tested routers from Utility, Sierra, and Cradlepoint to determine if MDT connectivity could be improved. All modems improved Mobile Data Terminal (MDT) connectivity.

The router may be compatible with BAND 14.

The minimum number of vehicles needing routers is 65. The total number may be scaled up to 92 vehicles depending on the needs of the agency.

Question # 6:
Regarding user licenses to the software - how many Admin licenses would the County need? These are typically in addition to camera holders, for managing system settings and user profiles, etc.

Answer
The County will need a minimum of 5 Administrative licenses.

Question # 7:
Can the County please clarify if you would like onsite training to be held at the HQ building, or will there be any trainings and equipment setup needed for other Weld County locations?
Answer

Onsite training, regardless of geographical assignment of personnel, will take place at the Weld County Sheriff’s Office HQ in Greeley or training sites within 5 miles.

Equipment set-up at other Weld County locations may be needed if required by the vendor’s solution. For reference, the Weld County Sheriff’s Office has substations located at 4209 WCR 24 ½, Longmont, CO 80504, and 2950 9th Street, Fort Lupton, CO 80621.

Question # 8:

Does the County have any existing LTE plans for the officers?

Answer

Deputies are currently issued an iPhone with 4G LTE with data capacity limits.
