Answers to questions for solicitation B1900117 – Jail drain pipe installation

August – 5, 2019

1) Question: Will the proposed attached alternative location for the new perforated drain pipe be acceptable in lieu of the original explained method?

Answer: The attached drawing is acceptable. The new drain pipe should be installed as closely as possible, but still below the existing buried conduit.
New Drain pipe will be offset from fiber rather than directly below fiber. To put the drain below the fiber will increase the cost dramatically.
