1. Can the County provide a copy of the conceptual design/layout?
   Answer: Yes. This very conceptual plan has been posted on the web site.

2. Does the County have environmental/cultural/surface water consultants who have surveyed the site for any required permitting needs as referenced in the RFP? Or are these studies not required for the necessary permits for this project?
   Answer: No consultants have been contacted. And this has not been identified as needed.

3. If Contractor is awarded this project, will it preclude them from providing materials or from bidding the follow-on construction project?
   Answer: No. At separate bid for materials and construction will be performed.

4. Will the winning bidder be requested to provide cost estimates for materials and construction (Total Installed Costs)?
   Answer: No

5. As referenced in the solicitation documents, are the 10 onsite meetings a requirement?
   Answer: Bidders should provide pricing to include 10 onsite meetings.

6. The first phase requires a 50-yd range and a 100-yd range. How many positions are required for each?
   Answer: 15-20 positions. The first phase also includes all earthwork needed for the future phases. So design shall incorporated consultants recommendations for those phases as well.

7. The future expansion civil area design requires berms, backstop, and site preparation for two (2) 25-yd ranges and one (1) 300-yd range. How many positions are required for each?
   Answer: 15-20 positions for the 25 -yard, 10 positions for the 300 -yard range

8. The future expansion requires one (1) 25-yd explosives range. What is the maximum explosion detonation expected in lbs TNT equivalent?
   Answer: This has not been identified. The consultant is expected to define the maximum detonation that is permissible as part of the project’s development
