QUESTION/ANSWER NUMBER ONE

- Question Received 3/2/20: On the SWMP plans, it does not mention any type of mulch and there is no bid item associated with mulch. Please clarify if mulch will be required. The estimated quantity would be approximately 7.4 Acres, which is the seeding estimated quantity minus the erosion control blanket estimated quantity.

- Answer: Yes, we anticipate that mulching will be required. Rather than issue a formal bidding addendum and revised bid schedule for this item, we anticipate that the Force Account (Erosion Control) will be utilized during construction. An estimated quantity will be developed during construction and the County will negotiate a unit cost for this work with the Contractor.
